To Whom It May Concern:

I am an experienced Editor (online/offline), Motion Designer, Visual Effects Artist and Animator in Toronto. My experience working in a broadcast and design environment since 2000 has created an opportunity where I can offer a great deal to your productions.

My production experience includes editing and motion design for commercial clients like Sony and Scotiabank, web series for Family Channel and BBC, as well as multiple lifestyle television series for broadcasters like Corus and an After Effects heavy series currently airing on TVtropolis. My feature work has won six Best Feature Awards at recognized festivals in North America (Gangster Exchange) and recently a feature was selected for TIFF 2010 (You Are Here). My work has been shown internationally and Producers regularly rely on me to develop their vision and deliver at a high standard.

I own a Final Cut Studio HD suite, 3D software, After Effects, and more. I understand and have worked in each stage of post production from offline stages with raw footage to polished edits, to online with colour correction, VFX and final output. I understand the characteristics of different production formats and the needs of a studio to deliver a quality product on schedule.

I have a traditional graphic design background which lead into interactive design a decade ago. This merged with my training in animation and I became an Animation Director with software like Maya. For the past ten years I have solidified this work around a strong broadcast studio environment involved in every stage of a production from creative direction to directing productions to completing each stage of post-production.

Please visit <http://www.jamiespurway.com> for samples of my work including a wide variety of motion design and editing.
